

# FREE FORM HEADLAMP CONVERSION KITS

Free form headlamps utilise computer designed highly-polished parabolic reflector technology delivering superior light control and output that is far more efficient than standard optic lenses. These kits are ideal for aftermarket replacement of sealed and semi-sealed beams or for original equipment manufacturing. Available in a selection of 7" polycarbonate headlamps and 5¾" hardened glass headlamps, the units are 'E' marked and ADR approved.

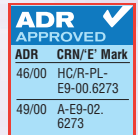

PART No. / DESCRIPTION

## 72002 H4 7" (178mm) 12V 60/55W High/Low Beam Free Form Halogen Headlamp Conversion Kit

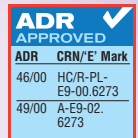

Utilising virtually unbreakable polycarbonate lenses, this kit features high/low beam function and replaces either sealed or semi-sealed beams and includes park lamp option

Comprises:

- 2 x headlamp inserts (P/No 72000)
- 2 x 12V H4 60/55W globes (P/No 48881)
- 2 x park lamp globes (P/No 17177)
- 2 x dust covers
- 2 x park lamp holders

## 72000 H4 7" (178mm) free form lamp only (globes not included)

NB: For 24V applications use H4 75/70W globe P/No 48892 and park lamp globe P/No 17197

## 72006 H1 7" (178mm) 12V 55W High Beam Free Form Halogen Headlamp Conversion Kit

Utilising virtually unbreakable polycarbonate lenses, this kit suits the high beam function of vehicles fitted with dual headlamp systems. Replaces either sealed or semi-sealed beams

Comprises:

- 2 x headlamp inserts (P/No 72004)
- 2 x 12V H1 55W globes (P/No 48320)
- 2 x dust covers

## 72004 H1 7" (178mm) free form lamp only (globes not included)

NB: For 24V applications use H1 70W globe P/No 48702

The exciting introduction of Free Form technology to the Narva headlamp range provided the opportunity to completely upgrade packaging across the range. The result is an impressive, full colour sleeved box that clearly and effectively displays all the models in the headlamp range and will just as comfortably work on a retail shelf as it will in a trade environment
